

KLONDIKE GOLD CORP

November 2017

Klondike Gold Corp. (TSX.V: KG / FRA: LBDP) is exploring for **orogenic style gold** deposits in the Klondike area, Yukon, Canada. Klondike Gold has acquired the entire district spanning 55km; searching beneath the historic 20 million-ounce Klondike placer goldfields for a potential Au bulk tonnage target. The 2017 drill season is complete. Drilling aimed to test the Bonanza Fault, Nugget Fault, and Eldorado Fault for character and extent of gold mineralization.

- Established in 1978
- Peter Tallman, President & CEO - 2014
- 2,780 contiguous claims
- 353 placer claims
- 55 square kilometers
- 100% claim ownership
