#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Klondike Gold Corp. is a Vancouver-based resource exploration company listed on the TSX Venture Exchange under the symbol "KG". The Company was incorporated on August 23, 1978, under the laws of the Province of British Columbia, Canada. The Company's head office is located at Suite 3123 - 595 Burrard Street, Vancouver, British Columbia, Canada, V7X 1J1, and the Company's registered and records office is located at Suite 2500 - 700 West Georgia St., Vancouver, British Columbia, V6Y 1B3.

These unaudited condensed interim consolidated financial statements have been prepared on the basis of a going concern, which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business. As at November 30, 2020, the Company had working capital of \$3,097,344 (February 29, 2020: \$134,689) and cash of \$3,204,505 (February 29, 2020: \$133,949). For the nine months ended November 30, 2020, the Company reported net loss of \$1,132,233, and an accumulated deficit of \$61,933,722 at that date. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms that are acceptable to the Company. The material uncertainty of the Company's success in raising additional capital funding casts significant doubt on the Company's ability to continue as a going concern. These unaudited condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations for the foreseeable future. These adjustments could be material.

#### 2. BASIS OF PRESENTATION

#### a) Statement of Compliance

The Company prepares its annual financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board. These unaudited condensed interim consolidated financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting and, except as described below, they follow the same accounting policies and methods of application as the Company's most recent annual financial statements. Accordingly, they should be read in conjunction with the Company's most recent annual financial statements.

#### b) Basis of Measurement

These unaudited condensed interim financial statements have been prepared on a historical cost basis except for financial instruments measured at fair value. In addition, these unaudited condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

#### c) Foreign Currencies

The presentation and functional currency of the Company is the Canadian dollar. All financial information is presented in Canadian dollars unless otherwise noted and all financial information has been rounded to the nearest dollar.

### NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE THREE AND NINE MONTHS ENDED NOVEMBER 30, 2020 AND 2019 (Expressed in Canadian dollars)

(Unaudited)

#### 2. BASIS OF PRESENTATION (continued)

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

#### d) Basis of Consolidation

#### Subsidiaries

Subsidiaries are all entities over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company until the date on which control ceases. All intercompany balances and transactions are eliminated upon consolidation.

Non-controlling interest in the net assets of the consolidated subsidiaries are identified separately from the Company's equity. The non-controlling interest consists of the non-controlling interest's portion of net assets and profit or loss.

#### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### a) Financial Instruments

Financial assets and financial liabilities are classified into three categories: amortized cost, fair value through other comprehensive income ("FVOCI") and fair value through profit or loss ("FVTPL"). The classification of financial assets is determined by their context in the Company's business model and by the characteristics of the financial asset's contractual cash flows.

Financial assets and financial liabilities are measured at fair value on initial recognition, which is typically the transaction price unless a financial instrument contains a significant financing component. Subsequent measurement is dependent on the financial instrument's classification.

Cash, restricted cash, amounts receivable, reclamation bond, trade and other payables, and lease are classified as and measured at amortized cost. The contractual cash flows received from the financial assets are solely payments of principal and interest and are held within a business model whose objective is to collect the contractual cash flows. The financial assets and financial liabilities are subsequently measured at amortized cost using the effective interest method. Investments are classified as and measured at FVTPL.

All financial assets except for those at FVTPL are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New accounting standards and interpretations

There are no new or upcoming accounting standards that are expected to have a material impact on the Company's financial statements.

#### 4. RESTRICTED CASH

The Company maintains one-year term deposits as collateral for the credit cards, which automatically renew at maturity, of \$165,580 (February 29, 2020 - \$165,580). The Company has the ability to cancel its credit cards and receive the term deposits in full at any time.

#### 11. MANAGEMENT OF CAPITAL

The Company manages its cash and components of equity as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash on deposit in an interest bearing Canadian chartered bank account.

The Company is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the periods presented.

#### 12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial assets and financial liabilities are measured on an ongoing basis at fair value or amortized cost. The disclosures in the notes to these unaudited condensed interim consolidated financial statements describe how the categories of financial instruments are measured and how income and expenses, including fair value gains and losses, are recognized.

Disclosures about the inputs to financial instrument fair value measurements are made within a hierarchy that prioritizes the inputs to fair value measurement.

The levels of the fair value hierarchy are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities:

Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 Inputs that are not based on observable market data

The fair values of the Company's cash, restricted cash, amounts receivable, reclamation bond, trade and other payables, and lease approximate their carrying value, due to their short-term maturities. Common shares of publicly traded companies included in investments are classified as FVTPL and measured using Level 1 inputs. Warrants of publicly traded companies included in investments are classified as FVTPL and measured using Level 2 inputs.

As at the date of this report, the Company's risk exposures and the impact on the Company's financial instruments are summarized below:

#### 12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

#### a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk is attributable to cash, restricted cash and amounts receivable. Cash and restricted cash are held with large Canadian banks or brokerages. Management believes the risk of loss to be remote. The Company's amounts receivable is primarily comprised of amounts owing from the Government of Canada for input tax credits receivable. Accordingly, the Company does not believe it is subject to significant credit risk.

#### b) Liquidity risk

The liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company manages its liquidity risk through careful management of its financial obligations in relation to its cash position. Using budgeting processes, the Company manages its liquidity requirements based on expected cash flow to ensure there are adequate funds to meet the short term obligations during the year.

#### c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk:

#### i) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company holds its cash and restricted cash in bank accounts that earn variable interest rates. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values of the Company's cash and restricted cash balances as at the date of this report. The Company does not have any interest bearing debt.

#### ii) Foreign currency risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the Company's functional currency. The Company's purchases are predominantly transacted in Canadian dollars.

#### iii) Price Risk

The Company's ability to raise capital to fund exploration or development activities is subject to risk associated with fluctuations in the market prices of base and precious metals including gold, silver, zinc and lead, and the outlook for these metals. The Company does not have any hedging or other derivative contracts respecting its operations.

Market prices for metals historically have fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, levels of worldwide production, short-term changes in supply and demand, industrial and retail demand, central bank lending, and forward sales by producers and speculators.

#### 12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company has elected not to actively manage its commodity price risk, as the nature of Company's business is in exploration.

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

The Company is exposed to price risk with respect to its investments in Ximen (Note 5).

#### 13. SUPPLEMENTAL CASH FLOW INFORMATION

During the nine months ended November 30, 2020, the Company:

- Paid no cash for interest or income taxes.

#### 14. COVID-19 UNCERTAINTY

Since March 2020, the spread of COVID-19 has severely impacted many local economies around the globe. In many countries, including Canada, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. Global stock markets have also experienced great volatility and a significant weakening. Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions. As at the date of this report, the Company has not been directly impacted by the spread of COVID-19 however timelines for work conducted by contractors and suppliers has significantly lengthened.

The duration and impact of the COVID-19 pandemic, as well as the effectiveness of government and central bank responses, remains unclear at this time. It is not possible to reliably estimate the duration and severity of these consequences, as well as their impact on the financial position and results of the Company for future periods.
